

NO ARMY can stop an idea whose time has come.

A core belief of transcendentalism is in the inherent goodness of people and nature. Adherents believe that society and its institutions have corrupted the purity of the individual, and they have faith that people are at their best when truly "self-reliant" and independent.

"Confident that with YOUR help, man will be what he was born to be: free and independent."

"Does the individual have the courage to really go along with the TRUTH?"

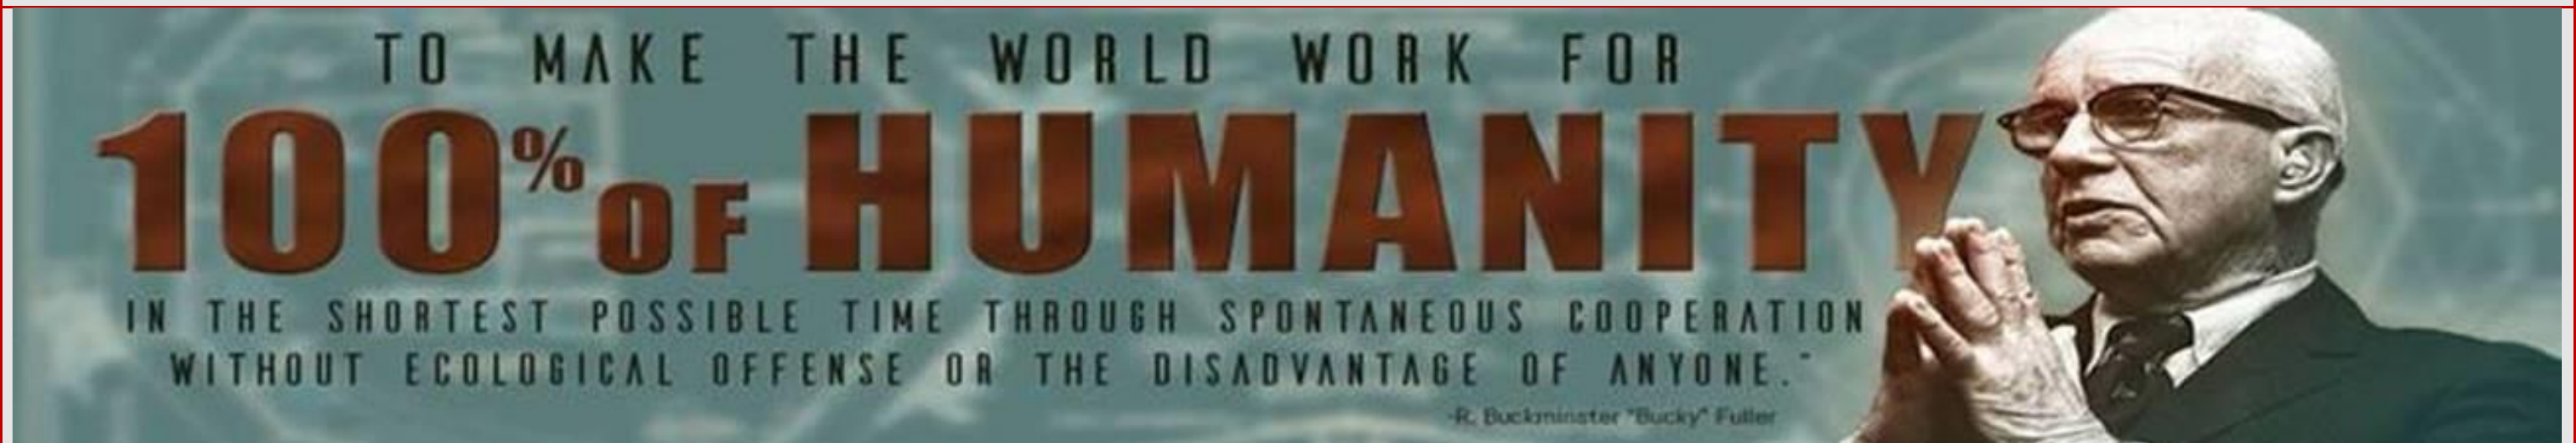

"It is a crime for any citizen to shrink from controversy."

"When TRUTH represents an existential threat, then censorship is deployed."

"Those who make peaceful revolution impossible will make violent revolution inevitable."

On October 29, 2018, Indonesian Lion Air Flight 610 from Soekarno-Hatta International Airport in Jakarta to Depati Amir Airport in Pangkal Pinang, crashed into the Java Sea 12 minutes after takeoff. All 189 passengers and crew were killed in the accident.<sup>[1][2][3]</sup> The preliminary report tentatively attributed the accident to the erroneous angle of attack data and automatic nose-down trim commanded by MCAS.<sup>[4][5]</sup> The 737 MAX aircraft was delivered 2 months and 16 days prior, on August 13, 2018.

The FAA issued an Emergency airworthiness directive number 2018-23-51 in which it addressed the potential for uncommanded nose-down by the "vertical trim system" in response to AoA indications, but does not mention MCAS by name. It requires pilots to recognize warnings triggered by erroneous AoA data, and take corrective action by following a "runaway trim" checklist.<sup>[6]</sup>
